

TASK 1: Create a GIT repository named as your enrollment number.
Create 2 folder in your repository named as Assignment_1 and Assignment_2.

Step 1: Create a GitHub Repository

- I logged into GitHub.
- Clicked on "New Repository".
- Entered my 2302031000108 as the repository name.
- Selected the repository as Public/Private.
- Clicked on "Create Repository"

Step 2: Setting Up the Repository Locally

- Installed Git if not already installed.
- Opened Git Bash / Command **Prompt**.
- Ran the following command to clone my repository to my computer:
 - o `git clone https://github.com/dhruvin-519/2302031000108.git`
- Navigated to the cloned repository:
 - o `Cd:WT/2302031000108`

Step 3: Creating Assignment Folders:

- Create Assignment folders inside the repository.
 - o `mkdir Assignment_1 Assignment_2`
- Verify folders using following command.
 - o `ls`

Step 4: Adding and Committing Changes:

- Staged the new folders:
 - o `git add .`
- Committed the changes with a message:
 - o `git commit -m "Added Assignment_1 and Assignment_2 folders"`
- Push the changes to Github:
 - o `git push origin main`
